Q2.

Laws of reflection -

- (i) The angle of incidence is equal to the angle of reflection.
- (ii) The incident ray, reflected ray and normal all lie in the same plane.

Q1.

Refraction of light is the bending of light as it passes from one transparent medium to another due to a change in its speed.

Q4.

don't
forget
units!

When an object is placed beyond $2F$ of a convex lens, the image formed is real, inverted, and diminished in size, and is formed between F and $2F$ on the other side.

Ray diagram -
(diagram)

Q3.

The pH scale measures how acidic or basic a solution is, ranging from 0 to 14.

Acidic: pH less than 7

Neutral: pH equal to 7

Basic: pH greater than 7

Q6.

(a) Respiration is the process of breakdown of food to release energy in cells.

(b) Aerobic respiration occurs in presence of oxygen and releases more energy; anaerobic respiration occurs without oxygen and releases less energy.

Q8.

Digestion begins in the mouth where saliva breaks down starch. In the stomach, gastric

juice digests proteins. In the small intestine,
bile and pancreatic juice further digest fats,
proteins and carbohydrates, which are then
absorbed into the blood.
