

Class 10 Science - Unit Test

Name: _____ Roll No: _____ Total Marks: 30 Time: 1 Hour

Instructions: Attempt all questions. Marks for each question are indicated in brackets.

1. Define a displacement reaction. Give one example with a balanced chemical equation. **[2]**
2. State Newton's second law of motion and write its mathematical expression. **[3]**
3. Write the chemical formula of baking soda and mention two of its common uses. **[3]**
4. Explain the process of photosynthesis. Draw a neat, labelled diagram of a leaf showing the raw materials and products involved. **[5]**
5. Differentiate between a mixture and a compound. Give one example of each. **[4]**
6. Answer the following:
 - (a) State the SI unit of electric current. **[1]**
 - (b) State Ohm's law and write its mathematical expression, defining each term used. **[3]**
7. List two everyday applications of Ohm's law. **[2]**
8. Why is the ozone layer important for life on Earth? Suggest two measures to reduce ozone depletion. **[4]**
